

A Strong Portfolio of Products Offered in UK

For more than 25 years, ACE has been helping multinational companies manage risk around the world. Our breadth of products, depth of expertise and appetite for risk make us a valued partner for companies across the spectrum of global business.

ACE UK MAJOR RISKS

At ACE we recognise that large companies must maintain a dynamic and sustainable approach to managing risk. For this you need to consider more than just insurance; you need a trusted, global partner for your risk management strategy.

We work with and create insurance solutions for many major corporations worldwide. We help manage both costs and exposures, playing a pivotal role in preserving an organisation's assets and protecting future earnings.

CASUALTY

ACE's liability products offer clients protection against the threat of legal action in an increasingly litigious environment. ACE GPS liability products provide employers' public and product liability protection to companies operating in, or exporting to, countries and regions beyond their home borders.

Once a company begins to operate beyond its home country borders, the complexity increases significantly. ACE provides bespoke solutions to minimise this complexity for a wide range of companies, from pure exporters with limited international presence to large multinational enterprises with multiple subsidiaries and joint ventures across the world. ACE is widely recognised as one of the leading liability insurance underwriters worldwide.

PROPERTY AND BUSINESS INTERRUPTION PROGRAMMES

ACE GPSSM property products provide asset protection for companies operating in countries and regions beyond their home borders. We offer comprehensive risk management programmes, services and speciality products to meet the needs of multinational companies. Through our Property Engineering initiatives, we also provide consulting services to create long-term property solutions.

FINANCIAL LINES - COMMERCIAL

Companies today are confronted with a growing array of complex laws, rules and regulations around the world, which increase the possibility of loss and consequent litigation. Nearly every industry can be affected by suits against the company, management and employees. ACE GPSSM offers critical management and liability products to provide crucial protection against the liabilities of companies, directors, officers, employees and trustees of organisations operating in countries and regions beyond their home borders. The superior products are supported by knowledgeable and experienced underwriting teams and backed by exceptional customer service and responsive claims administration. The team is dedicated to working with retail brokers and is committed to establishing solid, long term client relationships.

ENVIRONMENTAL LIABILITY PRODUCTS

ACE Environmental Risk provides market-leading environmental liability insurance solutions for global companies with both domestic and foreign operations or exposures. Our products include Premises Pollution Liability (PPL) Contractors Pollution Liability (CPL) and ACE Environmental Protect broad form product.

CYBER LIABILITY

Today organisations throughout the world rely on information technology to carry out their business. Whether from the private or public sectors, from the smallest to the largest organisations, computer systems are at the centre of business.

The reliance on information technology has brought with it new risks. Loss or corruption of data can have a debilitating effect on an organisation's ability to operate.

PROFESSIONAL INDEMNITY / ERRORS AND OMISSIONS

Once a company begins to operate beyond its indigenous borders, it will be confronted with a growing array of complex laws, rules and regulations, which, if not managed diligently, may increase the possibility of loss and consequent litigation. ACE GPSSM critical management and professional liability products provide crucial protection against the liabilities of companies, directors, officers, employees, professionals, and advisors.

The superior products are supported by knowledgeable and experienced underwriting teams and backed by exceptional customer service and responsive claims administration. The team is dedicated to working with retail brokers and is committed to establishing solid, long term client relationships.

MARINE GLOBAL PROGRAMMES

We offer individually tailored marine products to meet the needs of multinational companies. ACE GPSSM clients have access to our marine underwriters, claims, recoveries and transportation risk management specialists worldwide.

ACCIDENT AND HEALTH

Group Personal Accident - Multinational Clients

Many organisations say that people are their most important asset. Some act accordingly. Does yours? As markets mature and international trade grows, as businesses expand geographically, as enterprises focus increasingly on higher value goods and services, people matter more. Business experience, technical skills, industry expertise - and the people who have them - are ever more valuable. Recruitment, training and the cross-border transfer of best practices become huge investments for large organisations, especially multinational organisations. And for financial and practical reasons, management must protect these investments, these people.

Business Travel Accident - Multinational Clients

The risks your employees face, whether travelling domestically or travelling overseas, continue to mount. Your employee population is more geographically diverse and more mobile than ever before. More time travelling means greater exposure to accidents, illness and inconvenience. And those people on the front line are often the most critical to your business - senior management, top producers and key employees.
